SecurePig® FLASH

Stress affects all pigs, on every operation, regardless of location or management approach.

SecurePig® Flash was the first innovative pour-on product of its kind, easy to use and designed to help your pigs better cope with stress. It appeases pigs by replicating the effects of its natural analog, the pig appeasing pheromone (PAP), which is naturally secreted by sebacious glands on the sow's udder.

- **SCIENTIFICALLY PROVEN**
  RESEARCH IN PEER REVIEWED SCIENTIFIC JOURNALS
- **EASY-TO-USE**
  LOW VOLUME POUR-ON, NO INJECTION
- **TRUSTED GLOBALLY**
  MILLIONS OF DOSES SOLD WORLDWIDE

When can I use SecurePig® Flash?

HANDLING / PROCESSING • TRANSPORT
WEANING • CARE • COMMINGLING
NEW ENVIRONMENT • VACCINATION

Pour on. Stress gone.

No adverse effects / no residues
Veterinary health product NN.T7Y2

BENEFITS

IN PREGNANT SOWS

- Reduced aggressiveness
- Optimization of maternal behavior and lactation
- Promotes positive social behaviors

IN PIGLETS

- Decreases stress associated with weaning
- Reduces mortality
- Improves ADG and feed conversion ratio
- Optimizes growth and feed intake
- Promotes positive social behaviors

IN FINISHING PIGS

- Decreases aggression and the duration of fights (including tail biting)
- Reduces mortality
- Optimizes ADG
- Increases batch uniformity
- Optimizes growth
- Promotes positive social behaviors

HOW IT WORKS

Pigs detect pig appeasing pheromone (PAP) through their vomeronasal organ which transmits the message to the brain. The message is passed to brain areas that control emotions and the various physiological mechanisms they influence. The brief action allows the animal to use its adaptive abilities without being overwhelmed by stress. SecurePig® Flash proprietary formulation was created to optimize delivery to the target organ.

Duration of action: 5 days

HOW TO APPLY

Apply the solution 4 to 6 hours before the stressful event.

1. Shake well before using and then remove the cap.

2. Attach the pre-calibrated 5 mL dosing applicator.

3. Apply the full 5 ml dose on top of the animal's neck

PRODUCT COMPARISON

	SecurePig®	Competitor	
Bottle Size	1000 ml	300 ml or 4 L	
Dose (mL per head)	5 ml	< 250 lb	> 250 lb
		5 ml	10 ml
Treatment Location(s)	Top of Neck	Muzzle & Forehead	
Head Treated Per Bottle	200	< 250 lb	> 250 lb
		200	100
Active Ingredient Concentration	1%	10%	

ONE SINGLE 5 mL DOSE

OTHERS ARE 10 mL

APPLY TO ONE LOCATION

OTHERS REQUIRE 2

TREATS 2X HEAD PER BOTTLE

WHEN PIG IS OVER 250 LBS.

SecurePig®Flash's proprietary formulation optimizes its ability to reach the target organ quickly with one convenient dose.

This is the reason the competitor requires you to deliver 17.2 TIMES the amount of active ingredient per dose and apply it in TWO LOCATIONS to get the same results.
