See What the Herd Is Telling You

Metabolic change often starts before clinical problems become obvious.

Strategic blood profiling helps identify how cows are adapting, and where management deserves a closer look.

A good example- *transition cows* :

Measure
Bring practical blood biochemistry closer to the cow.

Understand
See how cows are adapting through transition.

Prevent
ID emerging metabolic challenges and

...respond sooner!

Metabolic Insights where Decisions Happen

BoviLab brings practical blood biochemistry closer to the cow, thereby helping veterinarians, nutritionists and producers understand metabolic adaptation while there is still time to act.

Measure. Understand. Prevent.

Cowside metabolic insights for earlier, informed action.

BoviLab

Practical metabolic profiling
Right on the farm

Why choose *BoviLab*?

01 Fast, cowside answers

Results in **~7 minutes from whole blood**. No centrifuge. Less lag between sampling and action.

02 The right analytes

Measure key biomarkers, including **NEFA**, to capture important dimensions of physiological adaptation.

Each cassette brings together the markers most relevant to a **specific bovine use case**, making it easy to choose the right test.

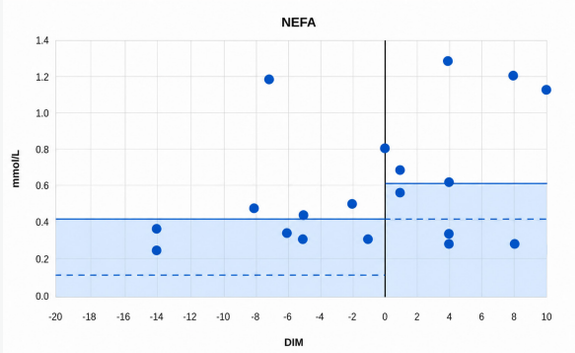

03 Metabolic Context

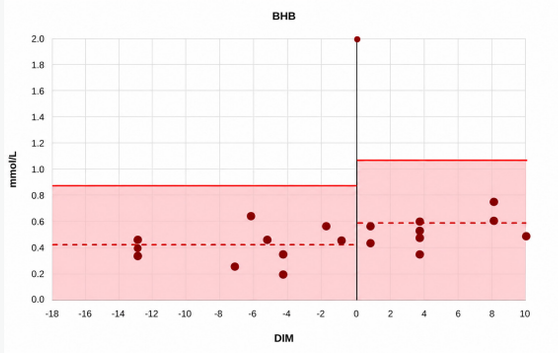

Move beyond isolated analytes and thresholds to understand patterns of **adaptation**.

Each cassette combines **six or more** markers selected for specific monitoring needs in dairy cattle.

04 Connected herd insights

Turn individual results into trends across cows, groups and time. Bring more **value** to your herds and your business.

How to use

Sample.

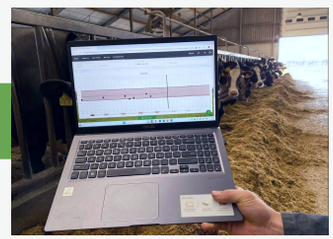

Load cassette.

Test.

Interpret

The cassettes

Transition
Energy | Minerals | Adaptation
NEFA · BHB · BUN · Ca · P · Mg

Liver Function
Hepatic Function | Protein | Energy
AST · GGT · TP · Alb · Chol · NEFA

Down Cow
Minerals | Muscle Damage | Energy
Ca · Mg · P · CK · AST · NEFA

Nutri Balance
Protein | Liver | Energy
Alb · Bili · Chol · TP · BUN · NEFA

Calf Nutri
Passive transfer | Protein | Metabolism
GGT · TP · Alb · BUN · Chol · BHB
